rule predicts M1 > S1
rule predicts M1 < S1
45%
OpenAI GPT-5
Google Gemini
Qwen3.5
S1 clearly below 45%
S1 CI straddles 45% (hollow: gain CI covers 0)
qwen3.5-9b cells failing G1 (point only)
gain = M1 − S1, points (95% CI)
single-agent pass[1] of the cell (S1), %
